

Aws – Jovac 2026

Name- Siddhi Sharma

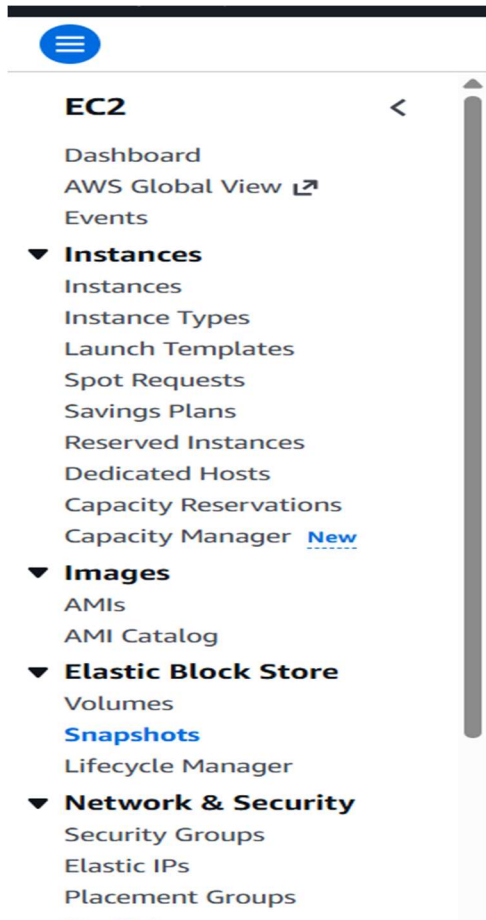

Univ roll - 2415001574

LECTURE 3

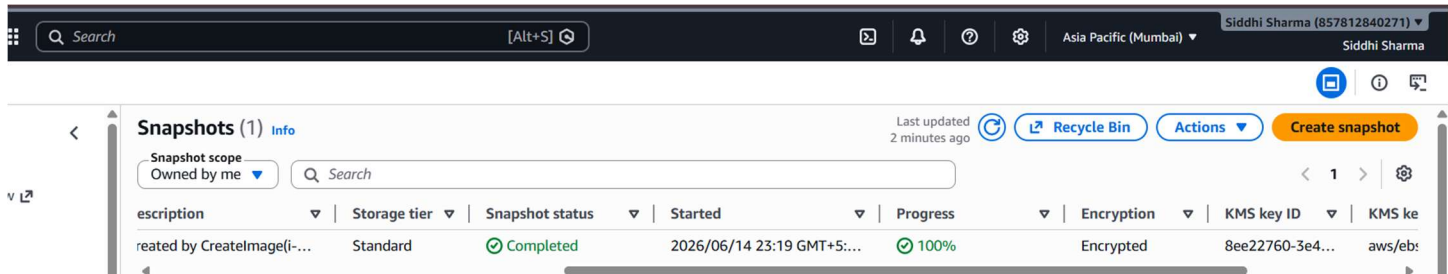

- Introduction to Operating System
- What is OS
- Functions of OS
- Components of OS
- OS interface (Command-Line & Graphics User Interface)
- Server vs Client OS

AMI – Lab (continued)

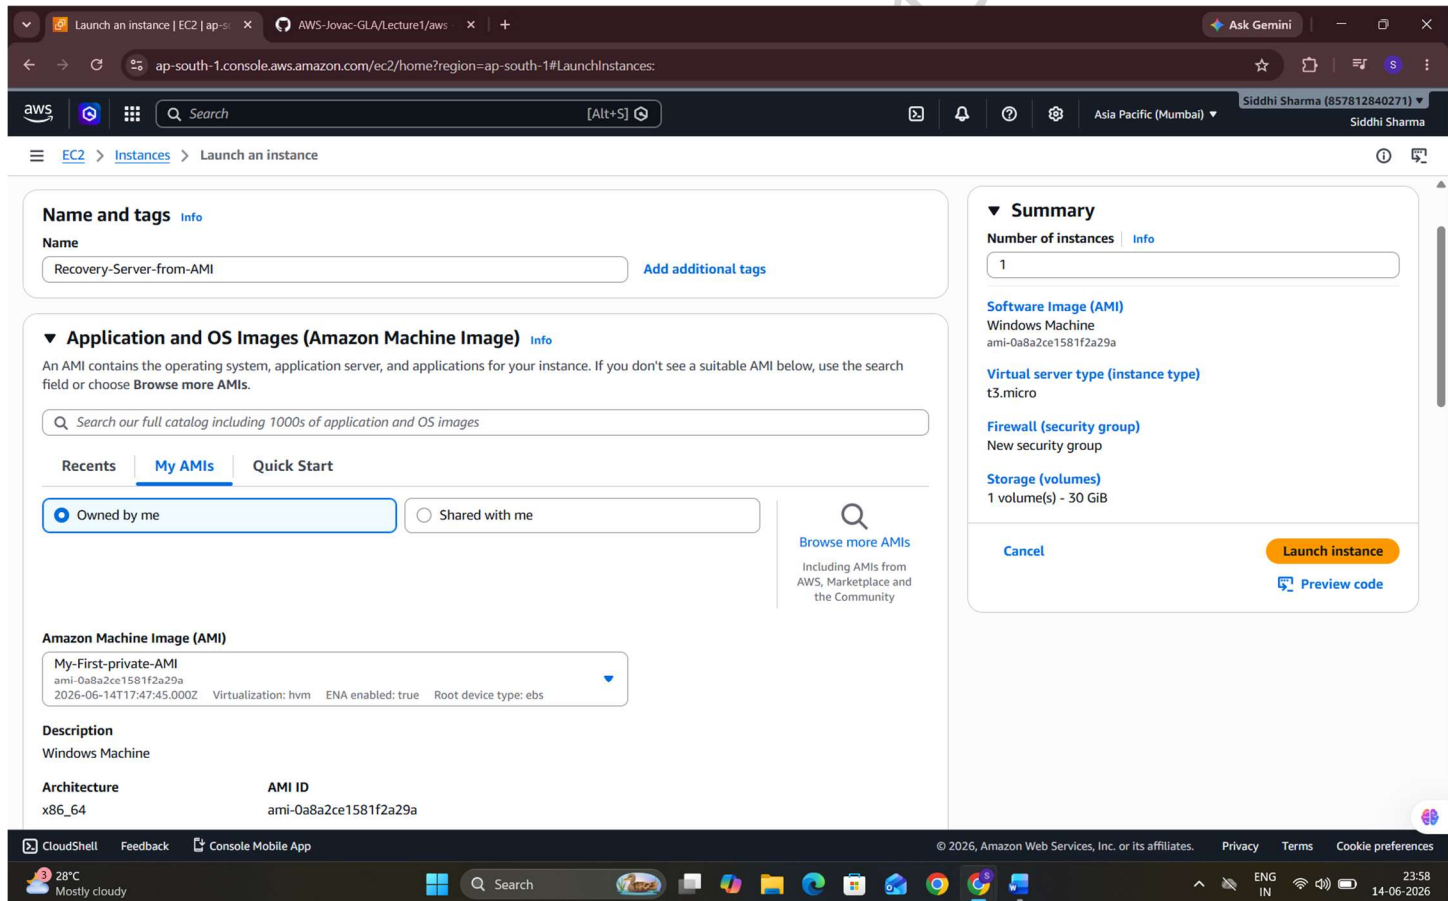

1. AMI created successfully And shown in Images - > Ami on left pane

2. We can select attributes to be shown by going to Preferences (gear icon) on top right below create snapshot button and then select attributes to be shown

3. Now , we can terminate the instance whose AMI we have created .
4. Now , we will create new instance using AMI we have created it should have the TXT file and Gitbash in new instance (that We have installed on previous instance whose AMI we have created)
5. In AMI section select my AMI

6. Select instance type we can select new instance type as per our choice and requirements
7. Select key pair

8. We can create server from AMI in same or different availability zone as per requirements

Launch an instance | EC2 | ap-south-1 | AWS-Jovac-GLA/Lecture1/aws

ap-south-1.console.aws.amazon.com/ec2/home?region=ap-south-1#LaunchInstances:

Key pair (login) [Info](#)

You can use a key pair to securely connect to your instance. Ensure that you have access to the selected key pair before you launch the instance.

Key pair name - **required**

Windows-machine-demo [Create new key pair](#)

For Windows instances, you use a key pair to decrypt the administrator password. You then use the decrypted password to connect to your instance.

Network settings [Info](#)

VPC - **required** [Info](#)

vpc-09d858fc18c3a0009 (default) [Refresh](#)

Subnet [Info](#)

No preference [Create new subnet](#)

Availability Zone [Info](#)

ap-south-1b aps1-az3 [Enable additional zones](#)

Auto-assign public IP [Info](#)

Enable

Firewall (security groups) [Info](#)

A security group is a set of firewall rules that control the traffic for your instance. Add rules to allow specific traffic to reach your instance.

☐ Create security group ☒ Select existing security group

Common security groups [Info](#)

Select security groups

default sg-0a4a3e5523a713f17 [X](#)

VPC: vpc-09d858fc18c3a0009

Security groups that you add or remove here will be added to or removed from all your network interfaces.

Compare security group rules

Configure storage [Info](#) [Advanced](#)
